

# ROBOBLAST

## Innovative Approach to Industrial Challenges

Our Roboblast solution overcomes the limitations of traditional robotics by offering precise access to difficult-to-reach areas, thanks to its 3DOF robotic arm. This capability ensures comprehensive treatment of complex geometries, making it a game-changer in surface maintenance.

## Key Advantages

- **3DOF Robotic Arm:** Enables unparalleled access to tight and complex areas, providing thorough coverage on curves, angles, and textured surfaces.
- **Real-Time Monitoring:** Integrated camera for live process visibility, ensuring consistent, high-quality outcomes.

## Applications

Ideal for industries requiring detailed surface preparation, including:

- **Shipbuilding and repairs**
- **Offshore platforms**
- **Bridges and structural maintenance**
- **Storage tank maintenance**

Explore the potential of our robotic solution for your maintenance needs. Contact us for more information. [info@roboblast.eu](mailto:info@roboblast.eu) +371 26120004
